<p>Additional Notes:</p> <p>Assembling Caregiver Kits is an effective, hands-on way you can . . .</p> <ul style="list-style-type: none"> • Show compassion for those suffering from AIDS • Equip caregivers with the practical materials they need • Encourage caregivers to continue caring selflessly for their neighbors <p><i>"I have four clients who need my care and support. If I choose to resign and give up the fight, who would take care of them? We know now that there are people who have love, who have compassion for us here. I get encouraged so that I can help the sick, knowing that there are others that are interested in helping the sick. This kit is very helpful. And it's for that reason that we need more kits to come, because people are still getting sick. Right now there are others who do not even have this kit . . . I'm asking the people in America to continue helping us with the kit." —Seddie Mwanza, Zambia</i></p>
